- **Self Parking Vehicle System**
- This project was realized in accordance with the theme of "Microcontroller Programming" with the name of "Self Parking Vehicle" to solve the parking problem, which is one of the problems that people frequently encounter in their daily lives. The purpose of our selection of this subject is to show that such projects can be developed in our country with less cost. 1. Designing the hardware part of the project and applying this design on the platform 2. Ensuring the movement of the designed vehicle and performing the parking process correctly with maneuvers even if the project is not applied to a real vehicle, the reality and movement operations and the maneuvers of the vehicle we designed were implemented taking into account the specified situations.

Conferences

- **ANDROID DEV DAYS**
- Last year, 45 speakers from Turkey and 20 speakers from abroad participated in the "Android Developer Days" organized by Google Developer Groups for two years. The speakers shared their developments and experiences on new and existing mobile technologies .
Android Developer Days (AGG) , which is supported by the Chamber of Computer Engineers and organized in cooperation with the Google Developer Group (GDG) and IEEE, which is a volunteer in Turkey, will be held for the third time at METU Culture and Congress Center on 16 - 17 May 2016. Edited. The conference, the world's different experts in the field of software from the city and Turkey, took part as exhibitors and speakers.
